Project Packs - Drying supply & Data

Value Engineering + Technical support + High standard + efficiency

Resilient Group Ltd provide high specification, cost effective, alternatives to those offered by big brand suppliers.

We offer technical and engineering expertise to support you with all your project planning and we understand the importance of providing services and goods in a timely and professional manner.

Having our own technical team enables us to offer you a fantastic service. Our skilled team are always on hand

to provide a professional, comprehensive and fast response to any enquiries.

All products include the relevant test data, ensuring you feel safe in the knowledge that our products are right for your project.

We aim to return all quotes within 24 hours and our deliveries can be completed efficiently by our own drivers.

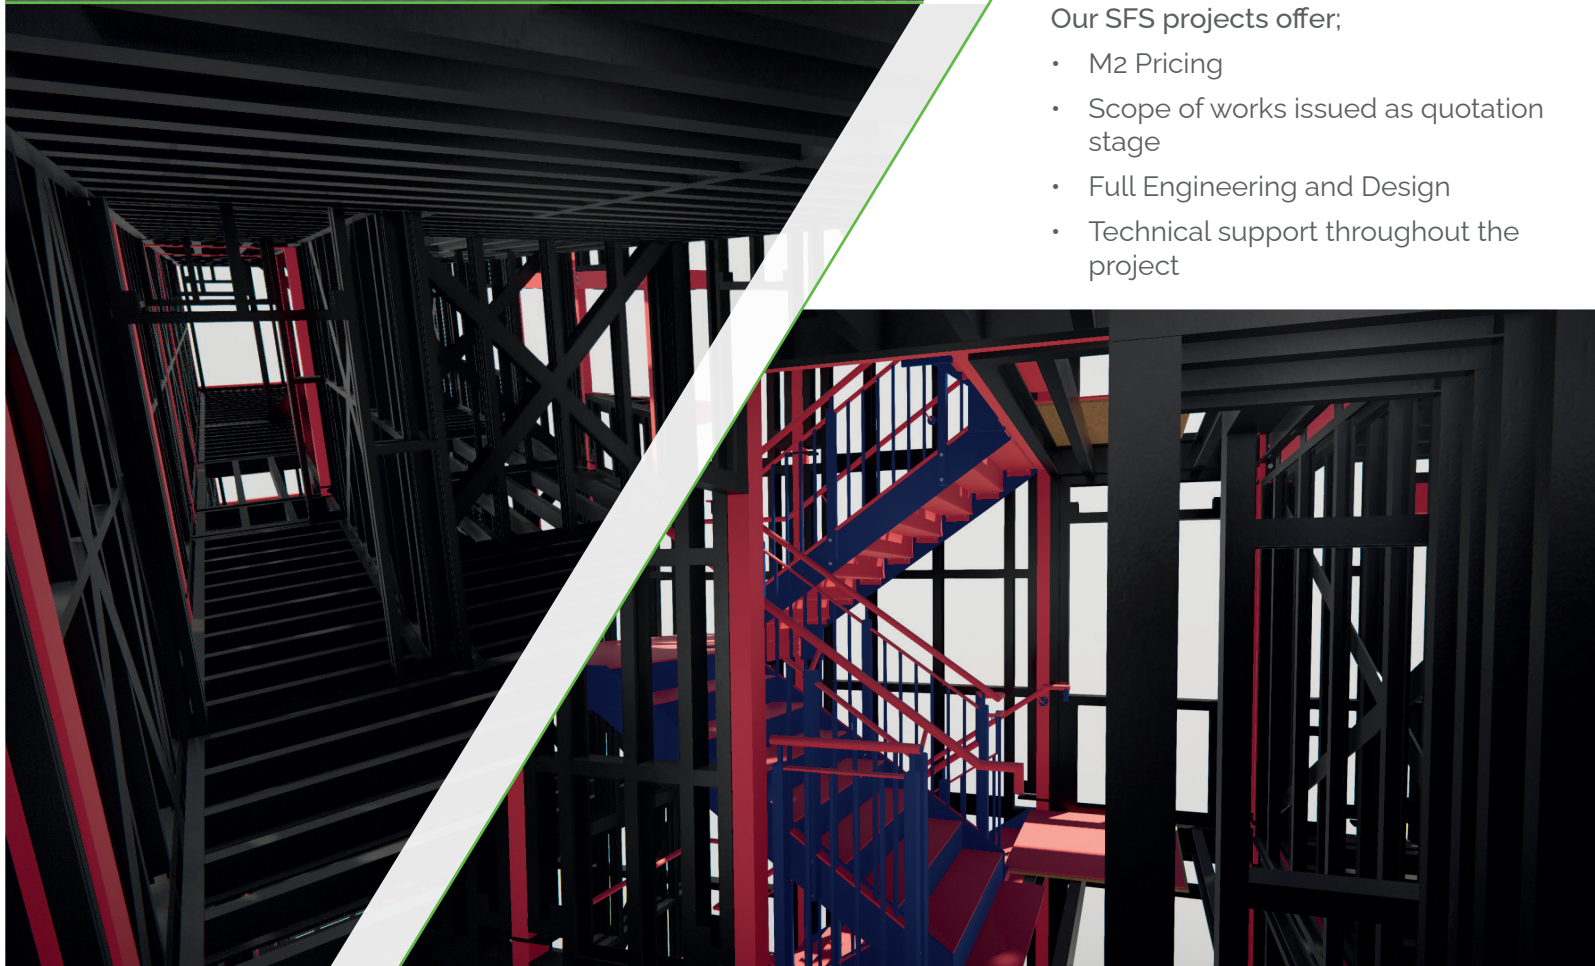

SFS Supply & Design

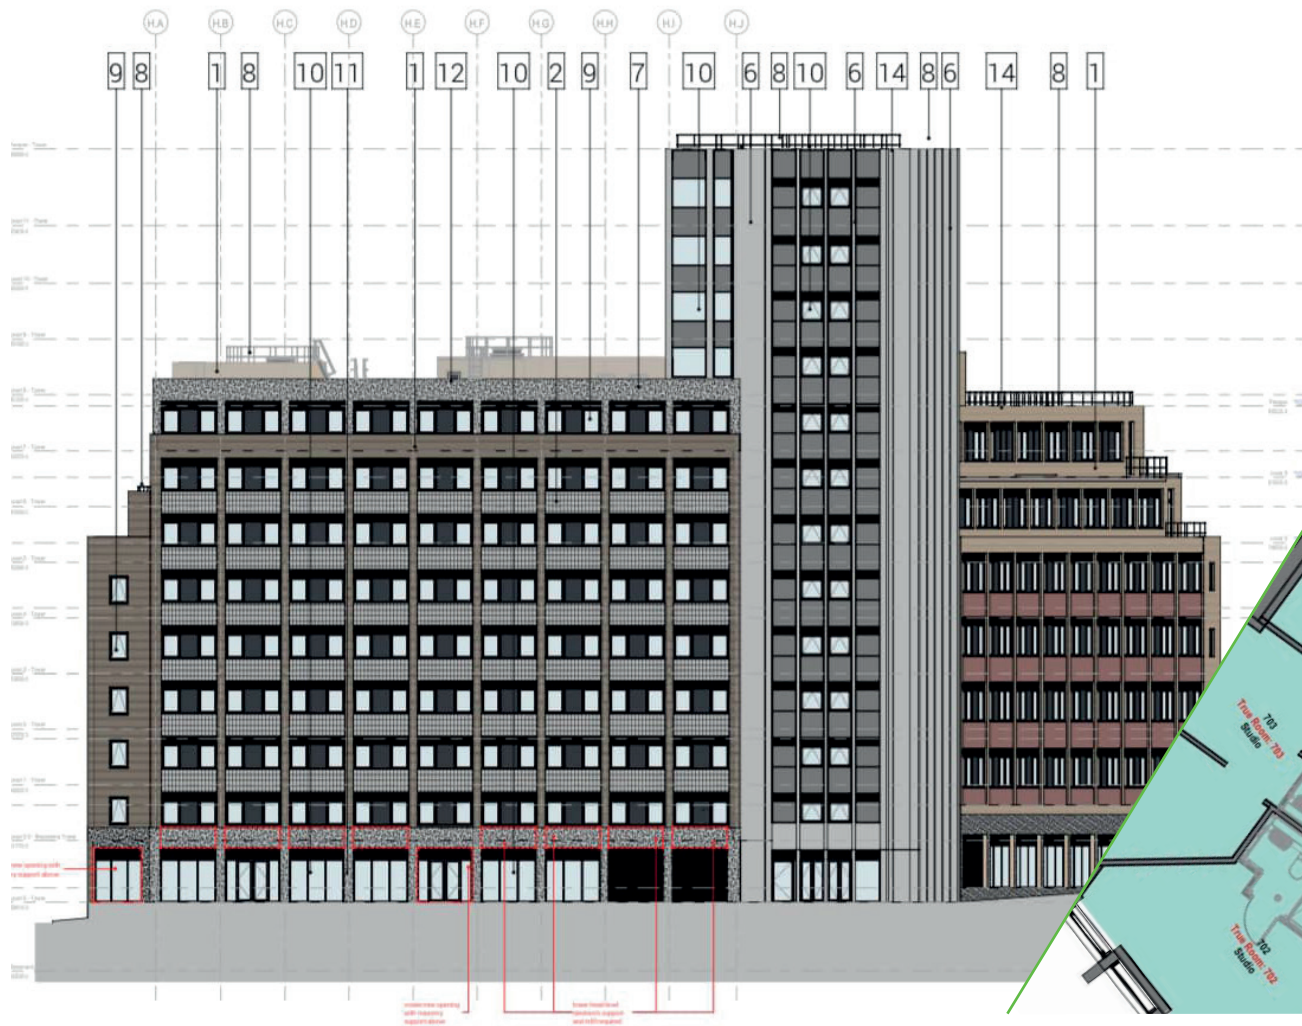

With a wide range of expertise in the LGSF industry, Resilient Group Ltd offers detailing solutions for SFS Loadbearing, SFS Infill and Oversail projects, along with a full design service.

Our SFS projects offer;

- M2 Pricing
- Scope of works issued as quotation stage
- Full Engineering and Design
- Technical support throughout the project
- Materials list based on finalised design
- Cut to length studs
- Standard fixing details
- Fire testing

Our designs are finished to a high standard by fully qualified structural engineers and draughtsmen. They are covered by full PL insurance.
